

— SOVICELL ADME KITS —

TRANSIL TECHNOLOGY

ADME kits that utilize a unique smart dialysis bead-based system to rapidly obtain accurate and reproducible pharmacokinetic data about drug candidates or other test substances.

FEATURES

- Ready to use kits
- Built in quality control
- Standardized assays
- Results within 30 minutes
- No sample preparation needed
- Extended shelf life
- Data analysis program included
- Solution for difficult samples

MEMBRANE BINDING & PERMEABILITY

- Brain Absorption
- Intestinal Absorption
- Microsomal Binding
- Membrane Affinity

PLASMA PROTEIN BINDING

- Human Serum Albumin (HSA)
- Human α 1 acid glycoprotein (AGP)
- PPB - HSA & AGP
- Rat Serum Albumin (RSA)
- Mouse Serum Albumin (MSA)
- High Sensitivity Binding
